Q1 2026 Results
Quarter Ending November 30, 2025

JANUARY 2026

NYSE-A: TRX / TSX: TRX TRXGOLD.COM

DISCLAIMER

TRX Gold Corporation ("TRX Gold" or the "Company"), has taken all reasonable care in producing and publishing information contained in this presentation. TRX Gold does not warrant or make any representations regarding the use, validity, accuracy, completeness or reliability of any claims, statements or information in this presentation. The information is not a substitute for independent professional advice before making any investment decisions. Furthermore, you may not modify or reproduce in any form, electronic or otherwise any information in this presentation. References to the Preliminary Economic Assessment ("PEA") and updates to the Mineral Resource Estimate were prepared by consultants who are independent of TRX Gold, each of whom are Qualified Persons ("QP") as defined by National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"). Each of the QPs have reviewed and confirmed that the information referenced fairly and accurately reflects, in the form and context in which it appears, the information contained in the respective sections of the PEA for which they are responsible.

The following acted as Qualified Persons under NI 43-101 as authors of the PEA:

P&E Mining Consultants Inc.

Eugene Puritch, P.Eng., FEC, CET – Mineral Resources

Andrew Bradfield, P.Eng. – Study leader and open pit mine design, scheduling and costs

D. Gregory Robinson, P.Eng. – Underground mine design, scheduling and costs

D. Grant Feasby, P.Eng. – Environmental

Fred H. Brown, P.Geo. – Mineral Resources

Yungang Wu, P.Geo. – Mineral Resources

William Stone, Ph.D., P.Geo. – Tenure, geology, drilling

Jarita Barry, P.Geo. – Data verification, QA/QC

D.E.N.M. Engineering Ltd.

David Salari, P.Eng. – Process plant expansion and process plant costing

Mr. William van Breugel, P.Eng, BAsc (Hons), Technical Advisor to TRX Gold Corporation, is the Company's Qualified Person under NI 43-101 and has reviewed and assumes responsibility for the scientific and technical content in this presentation.

The Toronto Stock Exchange and NYSE American have not reviewed the information on our website and do not accept responsibility for the adequacy or accuracy of it.

Forward-Looking Statements

This presentation contains certain forward-looking statements as defined in the applicable securities laws. All statements, other than statements of historical facts, are forward-looking statements. Forward-looking statements are frequently, but not always, identified by words such as "expects", "anticipates", "believes", "hopes", "intends", "estimated", "potential",

"possible" and similar expressions, or statements that events, conditions or results "will", "may", "could" or "should" occur or be achieved. Forward-looking statements relate to future events or future performance and reflect TRX Gold management's expectations or beliefs regarding future events and include, but are not limited to, statements with respect to results set forth in the PEA, continued operating cash flow, expansion of its process plant under the terms, exploration and conditions set forth in the PEA, expanding its open pit mining and initiating underground mining, current and anticipated price of gold, mine development plans, estimation of Mineral Resources, ability to develop value creating activities, recoveries, subsequent project testing, success, scope and viability of mining operations, the timing and amount of estimated future production, and capital expenditure. Although TRX Gold believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance. The actual achievements of TRX Gold or other future events or conditions may differ materially from those reflected in the forward-looking statements due to a variety of risks, uncertainties and other factors. These risks, uncertainties and factors include general business, legal, economic, competitive, political, regulatory and social uncertainties; actual results of exploration activities and economic evaluations; fluctuations in currency exchange rates; changes in costs; future prices of gold and other minerals; mining method, production profile and mine plan; delays in exploration, development and construction activities; changes in government legislation and regulation; the ability to obtain financing on acceptable terms and in a timely manner or at all; contests over title to properties; employee relations and shortages of skilled personnel and contractors; the speculative nature of, and the risks involved in, the exploration, development and mining business. These risks are set forth in reports that TRX Gold files with the SEC and the various Canadian securities authorities. You can review and obtain copies of these filings from the SEC's website at <http://www.sec.gov/edgar.shtml> and the Company's profile on the System for Electronic Document Analysis and Retrieval ("SEDAR+") at www.sedarplus.ca.

Technical information contained in this presentation is as of the date of the presentation and TRX Gold assumes no duty to update such information.

Note to U.S. Investors

US investors are advised that the mineral resource and mineral reserve estimated disclosed in this presentation have been calculated pursuant to Canadian standards which use terminology consistent with the requirements CRIRSCO reporting standards. For its fiscal year ending August 31, 2021, and thereafter, the Company will follow new SEC regulations which uses a CRIRSCO based template for mineral resources and mineral reserves, that includes definitions for inferred, indicated, and measured mineral resources.

EXECUTIVE TEAM

STEPHEN MULLOWNEY - CEO

- ▶ Former Partner & Managing Director at PwC, leading Deals Mining Group
- ▶ Vast experience in advising mining companies and Governments on operational improvements, financings, M&A, and stakeholder issues
- ▶ CPA, CA, CFA and BBA

RICHARD BOFFEY – COO

- ▶ Held several senior executive positions with multi-national mining companies
- ▶ 35+ years experience in open-pit and underground mining, including areas such as process plant commissioning, establishment of technical and operating teams, development of policies, and systems and process optimization

MICHAEL P. LEONARD – CFO

- ▶ Distinguished career in the gold industry with broad, progressive experience in investor relations and corporate finance with over 17+ years in financial leadership at Barrick
- ▶ Renowned for gold industry knowledge, and results oriented mindset
- ▶ CPA, CA

KHALAF RASHID – SVP, TANZANIA & MD

- ▶ Distinguished career in Tanzanian business, politics and Government
- ▶ Vastly experienced in advising the Government of Tanzania and well versed in Government policy
- ▶ Extensive leadership experience

TRX GOLD AT A GLANCE

Buckreef Is a Profitable Cash-Generating Mine with a Growing Production Profile and Exploration Upside

- TRX Gold is rapidly expanding the Buckreef Gold Project in Tanzania, consisting of a low-risk, high-margin open-pit gold mine, a multi-million oz gold resource, located in a 16 km² license area
- Robust 2025 PEA: Underground expansion with avg ~62k oz Au per year over 17.6 years, and NPV 5% of US\$1.9Bn pre-tax / US\$1.2Bn after-tax at US\$4,000/oz Au
- Blue-sky exploration upside with new high-grade discoveries
- Highest CSR and ESG standards
- Two-decade history in the Geita Region, Tanzania

PEA (April 2025) ⁽¹⁾	Avg annual production: 62,000 oz Au Mine life: 17.6 years LOM Cash cost & AISC: \$1,024/oz & \$1,206/oz Growth capital: \$89M over next 4 years Pre-tax NPV _{5%} : \$1,879M at \$4,000/oz Au Post-tax NPV _{5%} : \$1,239M at \$4,000/oz Au

KEY HIGHLIGHTS OF Q1 2026 (ENDING NOVEMBER 30, 2025)

Record Gold Production and Sales	<ul style="list-style-type: none">► Achieved record quarterly production of 6,597 oz and sales of 6,492 oz, representing a 35% increase over Q1 2025► On track to achieve its fiscal 2026 guidance of 25,000 – 30,000 oz gold at a total average cash cost of \$1,400 - \$1,600/oz
Record Realized Gold Price and Cash Generation	<ul style="list-style-type: none">► Realized gold price averaged ~US\$3,860/oz in Q1 2026, up from Q1 2025 average of US\$2,653/oz► Quarterly revenue \$25.1M and Adj. EBITDA of \$13.2M, demonstrating improved cash flow and margins
Strengthened Working Capital and Balance Sheet	<ul style="list-style-type: none">► Adjusted working capital ratio improved from 1.3 on August 31, 2025 to 1.7 on November 30, 2025► Cash balance increased to US\$9.2M (+US\$1.4M from Q4 2025)
Expanded Run-of-Mine Stockpile	<ul style="list-style-type: none">► ROM stockpile increased from 15,162 oz at August 31, 2025 to 19,698 oz as of November 30, 2025 and over 22,000 oz of contained gold today► Ongoing investment in mine infrastructure and development, mill optimizations, tailings storage facility expansions, and supplies inventory
Plant Optimization and Expansion Underway	<ul style="list-style-type: none">► Processing plant optimization and expansion advancing per the 2025 PEA► Analytical and metallurgical test work progressing on a flotation circuit► Procurement underway for near-term upgrades including thickener, elution plant/gold room improvements, and increased slurry oxidation capacity

Load and Haul with New 374 Excavator and Haul Truck

Aachen ® Reactor ready for shipment and Vendor Testwork Flotation Cells

Q1 2026 – FINANCIAL AND OPERATING OVERVIEW

Increase in Revenue, Gross Profit, and EBITDA¹

Gold production & sales: Poured 6,597 oz and sold 6,492 oz, generating:

- ▶ Revenue of \$25.1M, Gross profit of \$14.2M, EBITDA¹ of \$13.2M.
- ▶ Recorded a record average realized gold price net² of \$3,860 per ounce.

Growth Execution Underway: Commenced build-out of a larger processing facility than contemplated in the PEA, featuring a 3,000+ tpd sulphide processing circuit, a 1,000 tpd oxide/transition circuit, and a tailings retreatment capability (including sulphides).

Funding expected from internal cash flow over the next 18–24 months.

Exploration Plans: Exploration program started with a detailed 810 line-kilometer ground magnetic survey. Final geological interpretation is expected in fiscal Q2 2026.

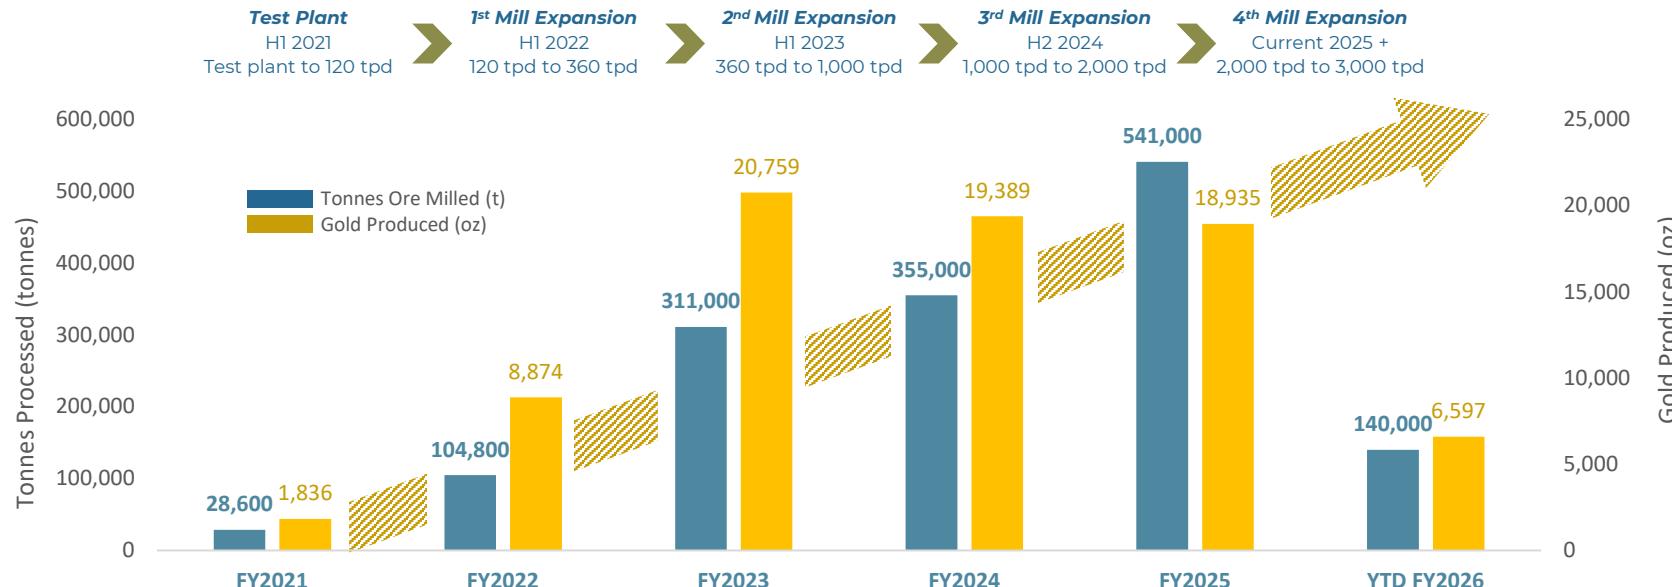

Metallurgical Testwork: Gold department testing across various geo-metallurgical domains within the Buckreef Main Zone, flotation and concentrate leach optimization testwork, and SAG and Ball Mill Circuit Design, as part of flowsheet optimization.

Fiscal 2026 Outlook:

- ▶ **Gold Production:** 25,000 – 30,000 oz at average cash cost of \$1,400 – \$1,600/oz.
- ▶ **Capital Expenditures:** US\$15 – \$20M. Focused on plant upgrade and expansion, construction of tailings storage, and excludes waste stripping.
- ▶ **Exploration Expenditures:** US\$3 – \$5M. Resource drilling on Main Zone and exploration drilling on Stamford Bridge and Eastern Porphyry.

Financial results in US\$ (at Nov 30 th of each year)	Q1 2026	Q1 2025

WHY TRX GOLD?

The Buckreef Gold Project is a High-Margin Scalable mine with Significant Exploration Potential

Strong Cash Flow Today

- ▶ High-margin, low-risk gold production in safe jurisdiction
- ▶ Realizing record prices >US\$4,000/oz
- ▶ Special Mining License, straightforward flow sheet, and proven operating team reduce risk
- ▶ Self-funded growth

Scalable Growth Plan

- ▶ Straightforward expansion plan to 3,000 – 4,000 tpd
- ▶ The next phase of growth is underway – in Q4 2025 commenced procurement of plant upgrades
- ▶ April 2025 PEA:
 - ▶ 62k oz/year, 17.6-year life
 - ▶ Pre-tax NPV_{5%}: US\$1.9Bn at US\$4,000/oz Au
 - ▶ LOM cash cost: US\$1,024/oz; AISC: US\$1,206/oz

Blue Sky Potential

- ▶ High-grade targets like Stamford Bridge Zone (250m from main pit)
- ▶ Multiple untested zones offer near-mine and regional resource expansion potential
- ▶ Tier-1 potential in elephant country with neighbours including Barrick and AngloGold Ashanti

STRAIGHT FORWARD VALUE ENHANCING BUSINESS PLAN

01

ROBUST GOLD ASSET IN TANZANIA

- ▶ Significant gold deposit: 893k oz M&I (at 2.57 gpt Au) and 726k oz inferred (at 2.47 gpt)
- ▶ Special Mining License, renewable every 10 years with expiry at end of life-of-mine
- ▶ Straightforward flowsheet and metallurgy
- ▶ Connected to local infrastructure including road and power
- ▶ Significant blue-sky exploration potential with the discovery of new zones including Anfield and Stamford Bridge
- ▶ Ample human capital availability due to long history of mining
- ▶ Long mining history in region

02

TRACK RECORD OF CAPITAL EXPANSION EXECUTION

- ▶ 3 successful expansions on time and on-budget to 2,000 tpd
- ▶ Managed as a self build successfully
- ▶ Next stage growth plans to 3,000 – 4,000 tpd
- ▶ Engineered by reputable international firms
- ▶ Executed in a cost-effective manner
- ▶ Supplier and logistics has been learned, managed and successfully executed
- ▶ Costs have been decreasing with each expansion

03

SUCCESSFUL RAMP-UP OF OPERATIONS

- ▶ High margin, low-cost operating profile
- ▶ Successful ramp-up of throughput and gold production
- ▶ Established cost profile which forms the basis for costs in the PEA (April 2025)
- ▶ Still significant cost reduction opportunities
- ▶ Both near-term and long-term growth catalysts
- ▶ Integrated local content plan
- ▶ Operating profile successful reinvested into exploration and expansions
- ▶ PEA sets a pathway for continued growth

04

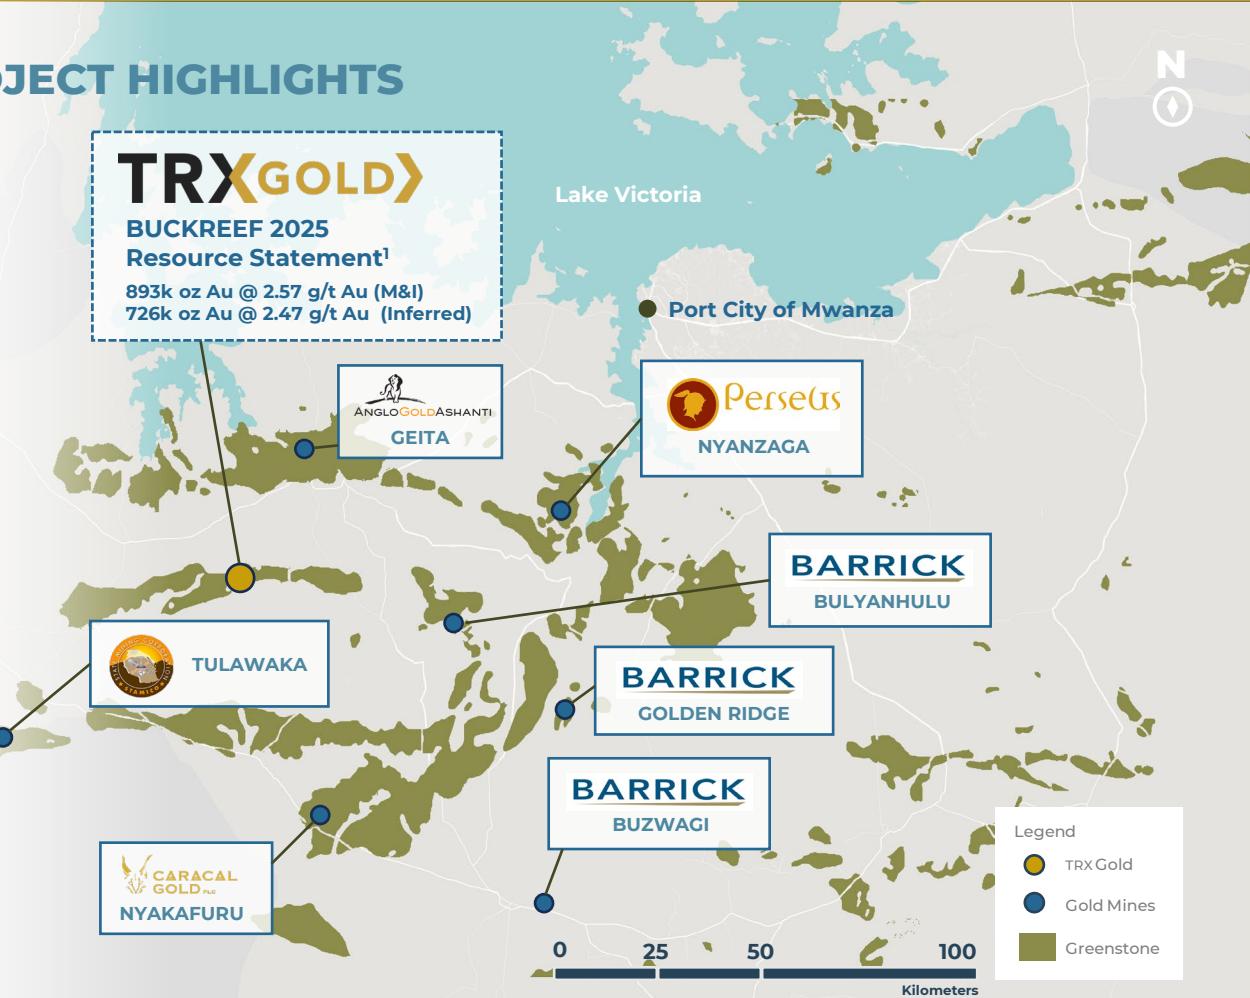

PROVEN MANAGEMENT EXPERTISE

- ▶ Successful turn around of operational level
- ▶ Upgraded management at corporate and at asset level
- ▶ Led three expansions and development of short-term and long-term operating plans
- ▶ Prudent managers of capital who identify and execute on quick returning projects

The Recently Released PEA Lays Out a Road Map For Significant Value Creation on Undervalued Company Relative to Peers

THE BUCKREEF GOLD PROJECT HIGHLIGHTS

- ▶ **Significant Gold Resource:** 2025 Mineral Resource estimate of 893k oz of gold in Measured & Indicated Resources and 726k oz in Inferred¹
- ▶ **Fully-Permitted:** Renewable Special Mining License (SML) secured through 2032, de-risking operations
- ▶ **Superior Metallurgical Recoveries:** "Easy metallurgy" with 90%+ recovery in oxide ore and 88%+ from sulphide ore potential
- ▶ **Shallow High-Quality Deposit:** Near-surface deposit with widths exceeding 20 meters, offering consistent and broad gold mineralization
- ▶ **Established Infrastructure:** Supported by reliable, mature physical and social infrastructure
- ▶ **Environmentally-Responsible:** Minimal footprint with a closed water circuit, hydroelectric-powered operations, and proper tailings management
- ▶ **Exploration Upside:** Several high-priority known-gold zones offer exceptional potential for resource expansion
- ▶ **Robust PEA:** NPV_{5%} of US\$1,181M pre-tax and US\$766M after-tax at US\$3,000/oz Au; 62,000 oz annual production for 17.6 years¹

BUCKREEF IS LOCATED IN ONE OF THE MOST INVESTABLE JURISDICTIONS IN AFRICA

- Demonstrated **support of foreign investment**, particularly in the mining sector.
- Gold exports worth **US\$2.95B** in 2023, up 39% from 2022, primarily generated by large scale mines.
- Over **US\$2B in M&A** and IPO transactions in country in the **last 24 months**.
- Well-established Mining Ministries and Environmental Council for proper oversight and governance.
- A **mature mining sector** substantially contributes to the country's GDP; **over 10% achieved in 2025**.
- An **efficient local supply chain** of providing high quality goods at competitive pricing.
- Ample **human capital expertise** due to long mining history and large mines in the country. Educational institutions have **mining programs**.

The Julius Nyerere Hydropower Station in Tanzania

Well-developed and reliable infrastructure including power resources allows the Buckreef Gold Project to be supported by renewable hydroelectricity.

DRILLS CONTINUE TURNING IN F2026

Blue-Sky Potential Plentiful at Buckreef Gold

Goal of Drilling is to Increase the Mineral Resource

- Recent discovery of the new Stamford Bridge shear zone demonstrating similar geology as Buckreef Main.
- Anfield & Eastern Porphyry: Multiple zones of strong mineralization **running sub-parallel and in close proximity** to the Buckreef Main Zone.
- Eastern Porphyry:** Hole BMDD298 intersected 14.0 m grading 3.48 g/t, including 3.0 m grading at 10.96 g/t from 27.0 m, and 25.23 m grading @ 1.62 g/t Au from 47 m.
- Anfield:** Hole AFDD001 intersected 2.94 m grading at 13.74 g/t, from 43.00 m.
- Wide zones** of mineralization under the historical pit showed **continuity over 200m**.
- 1 kilometer SW from the South Pit**, historical and shallow artisanal mine workings demonstrate further size potential of the known deposit.
- Exploration budget of \$3-5M in fiscal 2026**, including geophysics, resource drilling at the Main Zone, exploration drilling at the Stamford Bridge Zone, and RC drilling at Eastern Porphyry.

Anfield Zone with All Significant Intercept Map

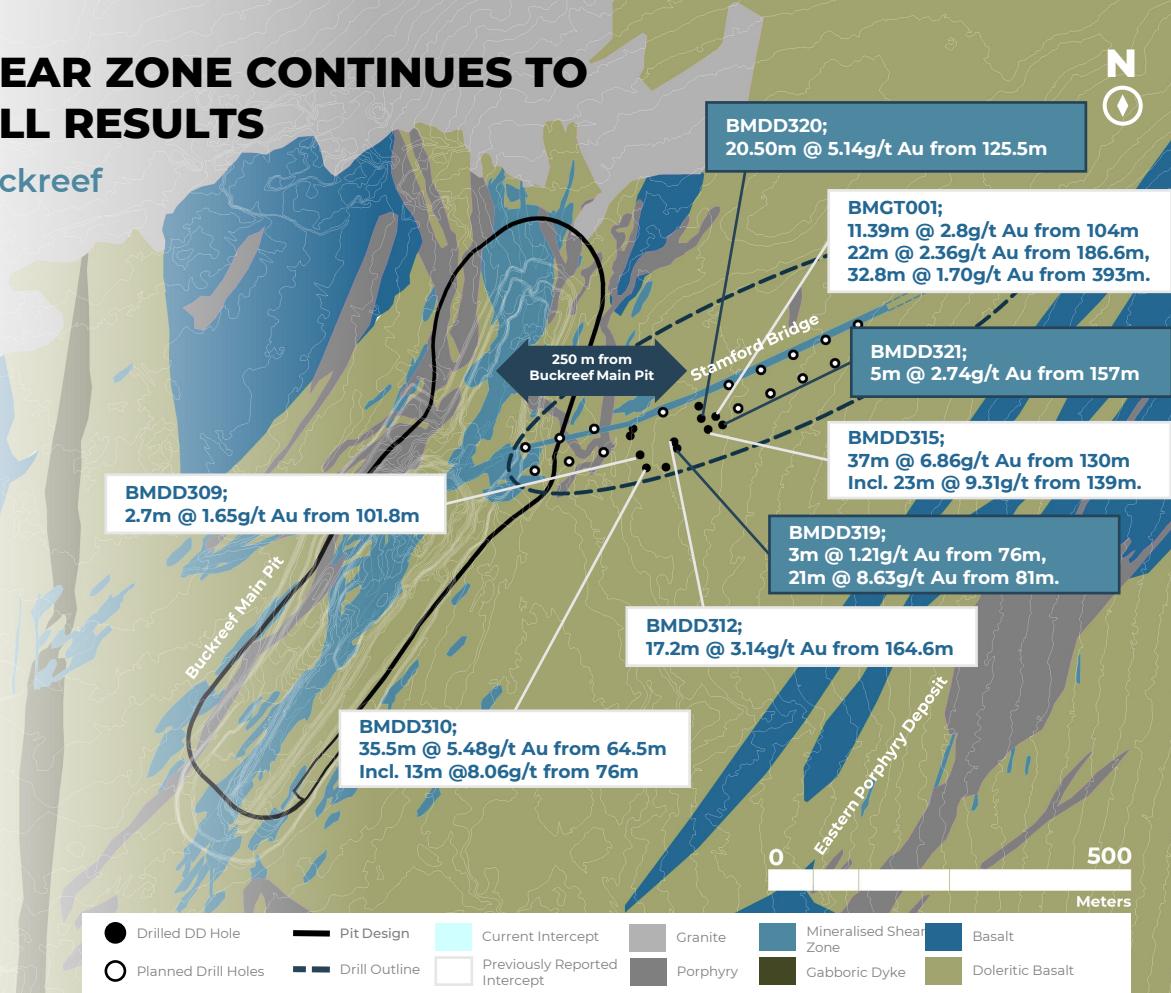

NEW STAMFORD BRIDGE SHEAR ZONE CONTINUES TO DELIVER ENCOURAGING DRILL RESULTS

Returning Best Drill Results EVER in Buckreef Gold's History – Announced in 2024

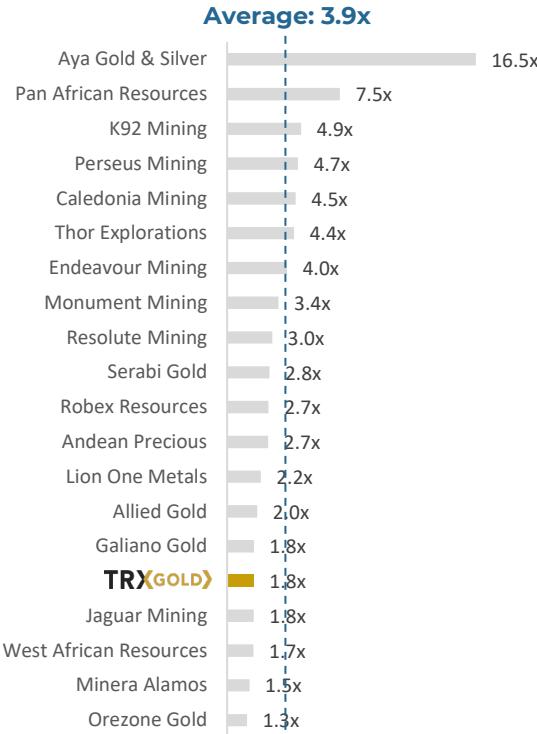

Stamford Bridge Shear Zone

- ▶ Best drill result ever, on a gram x tonne x meters ("gtm") basis ⁽²⁾:
 - ▶ **BMDD315** intersected **37 m @ 6.86 g/t Au (253.82 gtm)** from **130 m**.
 - ▶ **BMDD310** intersected **35.5 m @ 5.48 g/t Au (194.54 gtm)** from **64 m**.
 - ▶ **BMDD319** intersected **21 m @ 8.63 g/t Au (181.23 gtm)** from **81 m**.
 - ▶ **BMDD320** intersecting **20.50 m @ 5.14 g/t Au (105.37 gtm)** from **125.5 m**.
- ▶ Shear zone trending 070 East Northeast, forming a **"bridge"** between the Main Zone and Eastern Porphyry deposit and Anfield Zone to the Southeast.
- ▶ Stamford Bridge has the **potential to reach 1 km in strike length** and to become a significant shear structure.
- ▶ Follow up geophysics and targeted drilling will be carried out over next few months.

TRX 2020 to 2025 Mineral Resource Estimate Transition						
Classification	2020 MRE			2025 MRE		
	Tonne s (M)	Au (g/t)	Au oz (k)	Tonne s (M)	Au (g/t)	Au oz (k)
Measured & Indicated	38.6	1.77	2,195	10.8	2.57	893
Inferred	19.6	1.14	718	9.1	2.47	726

- ▶ The major sources of differences between the 2020 Mineral Resource Estimate (“MRE”) and 2025 MRE are as follows:
 - ▶ The 2025 MRE utilized a constrained optimized pit shell and underground workings which resulted in a reduction in volume for material to the 450 m EL level (which is the maximum depth of the underground workings in the PEA) as well as the exclusion of certain footwall and hanging wall low grade material (combined, this resulted in a reduction of ~10 Mt of material grading ~1.50 g/t Au containing ~500 koz);
 - ▶ The 2025 MRE utilized a cut-off grade of 1.3 g/t Au for underground mining versus a 0.4 g/t Au cut-off grade in 2020 MRE (this resulted in a reduction of ~25 Mt grading ~0.70 g/t Au containing ~500 koz);
 - ▶ Removal of ~ 4.5 years of production to date (this resulted in a reduction of 1.35 Mt grading 1.95 g/t Au containing 85 koz Au); and
 - ▶ Removal of Tembo and Bingwa deposits from 2025 MRE due to unquantifiable small scale mining activity by local residents (this resulted in a reduction of 2.1 Mt grading 2.12 g/t Au containing 143 koz).

APPENDIX – NOTES ON MINERAL RESOURCE ESTIMATE

Mineral Resource Estimate Methodology

The Buckreef Gold and Stamford Bridge Mineral Resource models were developed by P&E from 135 wireframes and one respective wireframe, all created by P&E over respective 2.2 km and 155 m strike lengths. Buckreef Gold utilized 884 drill holes while Stamford Bridge utilized eight. Wireframes were developed from an open pit cut-off of 0.40 g/t Au while underground was 1.20 g/t Au. Both Mineral Resource models utilized 1.0 m capped composites ranging from no capping to 60 g/t Au. Block models were set up with 2.5 m x 5.0 m x 5.0 m blocks rotated 30 degrees clockwise and used a bulk density of 2.70 t/m³. Grade interpolation was done with inverse distance cubed estimation. Based on variography, Measured Mineral Resources were those blocks classified within 20 m of three drill holes while Indicated Mineral Resources were classified within 40 m of three drill holes. All other wireframe constrained grade blocks were classified as Inferred Mineral Resources. Pit-constrained and out-of-pit Mineral Resources were reported above respective 0.42 g/t and 1.31 g/t Au cut-offs.

Notes

(1) Mineral Resources, which are not Mineral Reserves, may not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant issues.

(2) The Inferred Mineral Resource in this estimate has a lower level of confidence than that applied to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of the Inferred Mineral Resource could be upgraded to an Indicated Mineral Resource with continued exploration.

(3) The Mineral Resources were estimated in accordance with the Canadian Institute of

Mining, Metallurgy and Petroleum (CIM), CIM Standards on Mineral Resources and Reserves, Definitions and Guidelines prepared by the CIM Standing Committee on Reserve Definitions and adopted by the CIM Council.

(4) Gold price used is US\$1,900/oz Au.

(5) The pit constrained cut-off grade of 0.42 g/t Au was derived from 80% process recovery, US\$21.04/tonne process and G&A cost, and a royalty of 7.3%. The constraining pit optimization parameters were US\$3.88/t mining cost and 45-degree pit slopes.

(6) The out-of-pit cut-off grade of 1.31 g/t Au was derived from 80% process recovery, US\$21.04/tonne process and G&A cost, a US\$40/tonne underground mining cost, and a royalty of 7.3%. The out-of-pit Mineral Resource grade blocks were quantified below the constraining pit shell and within the constraining mineralized wireframes. Out-of-Pit Mineral Resources are restricted to areas which exhibit geological continuity and reasonable potential for extraction by cut and fill and long hole mining methods.

(7) The Stamford Bridge cut-off grade of 1.20 g/t Au was derived from 80% process recovery, US\$21.04/tonne process and G&A cost, a US\$35/tonne underground mining cost, and a royalty of 7.3%. Mineral Resources are restricted to areas which exhibit geological continuity and reasonable potential for extraction by cut and fill and long hole underground mining methods.

ENDNOTES

1. The company has included certain non-IFRS measures in this presentation. Refer to the Company's November 30, 2025 MD&A for an explanation, discussion and reconciliation of non-IFRS measures. The Company believes that these measures, in addition to measures prepared in accordance with International Financial Reporting Standards ("IFRS"), provide readers with an improved ability to evaluate the underlying performance of the Company and to compare it to information reported by other companies. The non-IFRS measures are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. These measures do not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures presented by other issuers.
2. Total cash costs are reflective of the cost of production. Total cash costs reported in the PEA include mining costs, processing and water treatment costs, general and administrative costs of the mine, off-site costs, refining costs, transportation costs and royalties. Total cash costs per ounce is calculated as total cash costs divided by payable gold ounces.
3. AISC is reflective of all of the expenditures that are required to produce an ounce of gold from operations. AISC reported in the PEA includes total cash costs, sustaining capital, closure costs and salvage, but excludes corporate general and administrative costs. AISC per ounce is calculated as AISC divided by payable gold ounces.
