CORPORATE PRESENTATION

Focused on Self-Funded Growth

JUNE 2026

NYSE-A: TRX / TSX: TRX [TRXGOLD.COM](https://www.trxgold.com)

DISCLAIMER

TRX Gold Corporation ("TRX Gold" or the "Company"), has taken all reasonable care in producing and publishing information contained in this presentation. TRX Gold does not warrant or make any representations regarding the use, validity, accuracy, completeness or reliability of any claims, statements or information in this presentation. The information is not a substitute for independent professional advice before making any investment decisions. Furthermore, you may not modify or reproduce in any form, electronic or otherwise any information in this presentation. References to the Preliminary Economic Assessment ("PEA") and updates to the Mineral Resource Estimate were prepared by consultants who are independent of TRX Gold, each of whom are Qualified Persons ("QP") as defined by National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"). Each of the QPs have reviewed and confirmed that the information referenced fairly and accurately reflects, in the form and context in which it appears, the information contained in the respective sections of the PEA for which they are responsible.

The following acted as Qualified Persons under NI 43-101 as authors of the PEA:

P&E Mining Consultants Inc.

Eugene Puritch, P.Eng., FEC, CET – Mineral Resources
Andrew Bradfield, P.Eng. – Study leader and open pit mine design, scheduling and costs
D. Gregory Robinson, P.Eng. – Underground mine design, scheduling and costs
D. Grant Feasby, P.Eng. – Environmental
Fred H. Brown, P.Geo. – Mineral Resources
Yungang Wu, P.Geo. – Mineral Resources
William Stone, Ph.D., P.Geo. – Tenure, geology, drilling
Jarita Barry, P.Geo. – Data verification, QA/QC
D.E.N.M. Engineering Ltd.
David Salari, P.Eng. – Process plant expansion and process plant costing

Mr. William van Breugel, P.Eng, BAsC (Hons), Technical Advisor to TRX Gold Corporation, is the Company's Qualified Person under NI 43-101 and has reviewed and assumes responsibility for the scientific and technical content in this presentation.

The Toronto Stock Exchange and NYSE American have not reviewed the information on our website and do not accept responsibility for the adequacy or accuracy of it.

Forward-Looking Statements

This presentation contains certain forward-looking statements as defined in the applicable securities laws. All statements, other than statements of historical facts, are forward-looking statements. Forward-looking statements are frequently, but not always, identified by words such as "expects", "anticipates", "believes", "hopes", "intends", "estimated", "potential",

"possible" and similar expressions, or statements that events, conditions or results "will", "may", "could" or "should" occur or be achieved. Forward-looking statements relate to future events or future performance and reflect TRX Gold management's expectations or beliefs regarding future events and include, but are not limited to, statements with respect to results set forth in the PEA, continued operating cash flow, expansion of its process plant under the terms, exploration and conditions set forth in the PEA, expanding its open pit mining and initiating underground mining, current and anticipated price of gold, mine development plans, estimation of Mineral Resources, ability to develop value creating activities, recoveries, subsequent project testing, success, scope and viability of mining operations, the timing and amount of estimated future production, and capital expenditure. Although TRX Gold believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance. The actual achievements of TRX Gold or other future events or conditions may differ materially from those reflected in the forward-looking statements due to a variety of risks, uncertainties and other factors. These risks, uncertainties and factors include general business, legal, economic, competitive, political, regulatory and social uncertainties; actual results of exploration activities and economic evaluations; fluctuations in currency exchange rates; changes in costs; future prices of gold and other minerals; mining method, production profile and mine plan; delays in exploration, development and construction activities; changes in government legislation and regulation; the ability to obtain financing on acceptable terms and in a timely manner or at all; contests over title to properties; employee relations and shortages of skilled personnel and contractors; the speculative nature of, and the risks involved in, the exploration, development and mining business. These risks are set forth in reports that TRX Gold files with the SEC and the various Canadian securities authorities. You can review and obtain copies of these filings from the SEC's website at <http://www.sec.gov/edgar.shtml> and the Company's profile on the System for Electronic Document Analysis and Retrieval ("SEDAR+") at www.sedarplus.ca.

Technical information contained in this presentation is as of the date of the presentation and TRX Gold assumes no duty to update such information.

Note to U.S. Investors

US investors are advised that the mineral resource and mineral reserve estimated disclosed in this presentation have been calculated pursuant to Canadian standards which use terminology consistent with the requirements CRIRSCO reporting standards. For its fiscal year ending August 31, 2021, and thereafter, the Company will follow new SEC regulations which uses a CRIRSCO based template for mineral resources and mineral reserves, that includes definitions for inferred, indicated, and measured mineral resources.

MISSION STATEMENT AND HIGH-LEVEL OVERVIEW

TRX Gold’s mission is to rapidly advance, scale, and unlock value at the Buckreef Gold Project in Tanzania through disciplined, high-margin, and sustainable mining. We are focused on generating positive cash flow, expanding mineral resources, and delivering long-term stakeholder and shareholder value.

FOCUSED ON GROWING UNDERLYING VALUATION METRICS

Self-funded growth in EBITDA, NAV and Resource Base

1

Rapid EBITDA Growth

- ▶ Processing plant expansion underway, including a new 3,500+ tpd SAG/Ball Mill
- ▶ Integration of optimized and upgraded existing processing plant
- ▶ Margin expansion from scale + improved recoveries
- ▶ Optimization and expansion of mine plan
- ▶ Low-cost operation with a continued focus on cost control remains paramount

2

Significant NAV Expansion

- ▶ Updated PEA in progress focusing on higher production rates and overall plant enhancements (maximizing throughput and recovery rates)
- ▶ Extension of open pit mining with underground optionality
- ▶ Robust gold price environment
- ▶ Exploration results will be incorporated over time
- ▶ Current PEA has \$1.9B NPV_{5%} Pre-Tax NPV¹ at 3,000 tpd capacity and \$4,000 gold

3

Increasing Resource Base

- ▶ First in-depth geophysics program to identify higher probability targets
- ▶ Robust exploration program planned
- ▶ High-grade Stamford Bridge discovery
- ▶ Very prospective Anfield zone
- ▶ Ongoing drilling and resource conversion
- ▶ Resource expansion feeds into EBITDA and NAV growth

Why TRX Gold Will Deliver on Future Growth

1. **Proven track record:** 3 plant expansions to 2,000 tpd completed on time and on budget
2. **Self-funded model** with **improved balance sheet:** \$26M+ cash balance
3. **Located in prolific mining-friendly region in Tanzania** with exceptional geology and majors operating nearby
4. **Large, high-quality resource base** with significant exploration potential

KEY HIGHLIGHTS OF PRELIMINARY Q3 2026 (ENDING MAY 31, 2026) ⁽¹⁾

Record Throughput & Production Growth

- ▶ Record quarterly throughput of 1,833 tpd in Q3 2026, a 25% increase from Q3 2025 (1,461 tpd)
- ▶ Q3 2026 gold production of 7,426 oz, up 58% from 4,687 oz in Q3 2025
- ▶ YTD production of 21,476 oz; on track for full-year guidance: 25,000–30,000 oz

Record GIC Inventory & Improved Gold Recovery

- ▶ Record GIC (gold in circuit) inventory of 1,706 oz, up >1,000 oz from Q2 2026, as TRX prioritized maximizing recovery and capturing additional value from processed ore; expected to support Q4 2026 production
- ▶ Gold recovery improved to 84.6% in Q3 2026, up 18% from 67% in Q3 2025

Record Gold Price Realization

- ▶ Record average gold price of ~\$4,731/oz in Q3 2026 (London PM fix), a 52% increase from Q3 2025 (\$3,114/oz)
- ▶ Revenue significantly higher year-over-year driven by higher production and record gold prices

Plant Expansion & Upgrades Advancing

- ▶ New 3,500 tpd SAG mill circuit: tendering commenced; award expected early Q4 2026
- ▶ Existing 2,000 tpd plant upgrades underway; expected completion in calendar Q4 2026

Full-Year Guidance Reaffirmed

- ▶ Full-year 2026 guidance reaffirmed at 25,000–30,000 oz of gold production
- ▶ YTD 21,476 oz produced through Q3 2026; strong Q4 expected on record GIC inventory
- ▶ Full financial statements and MD&A to be released mid-July 2026

Buckreef Gold Crushing and Conveyor Circuit

Stage 2 Expansion at Buckreef Gold

1

RAPID EBITDA GROWTH

Three expansions completed since 2021; expanding to 3,500+ tpd + existing, upgraded plant

	FY2021	FY2022	FY2023	FY2024	FY2025	YTD FY2026	FY2027 & Beyond
Avg Head Grade (g/t)	2.22 g/t	2.89 g/t	2.38 g/t	2.19 g/t	1.53 g/t	1.91 g/t	2025 PEA – 3,000 tpd

3

INCREASING RESOURCE BASE

Gold ounces in prolific location

Buckreef Gold – Mineral Resource Estimate (April 2025) ⁽¹⁾

	Cut-off (Au g/t)	Tonnes (k)	Au (g/t)	Au ozs (k)
Measured	0.42/1.31	3,049.6	2.37	232.6
Indicated	0.42/1.31	7,740.3	2.65	660.1
Measured & Indicated	0.42/1.31	10,789.9	2.57	892.7
Inferred	0.42/1.20/1.31	9,147.8	2.47	725.5

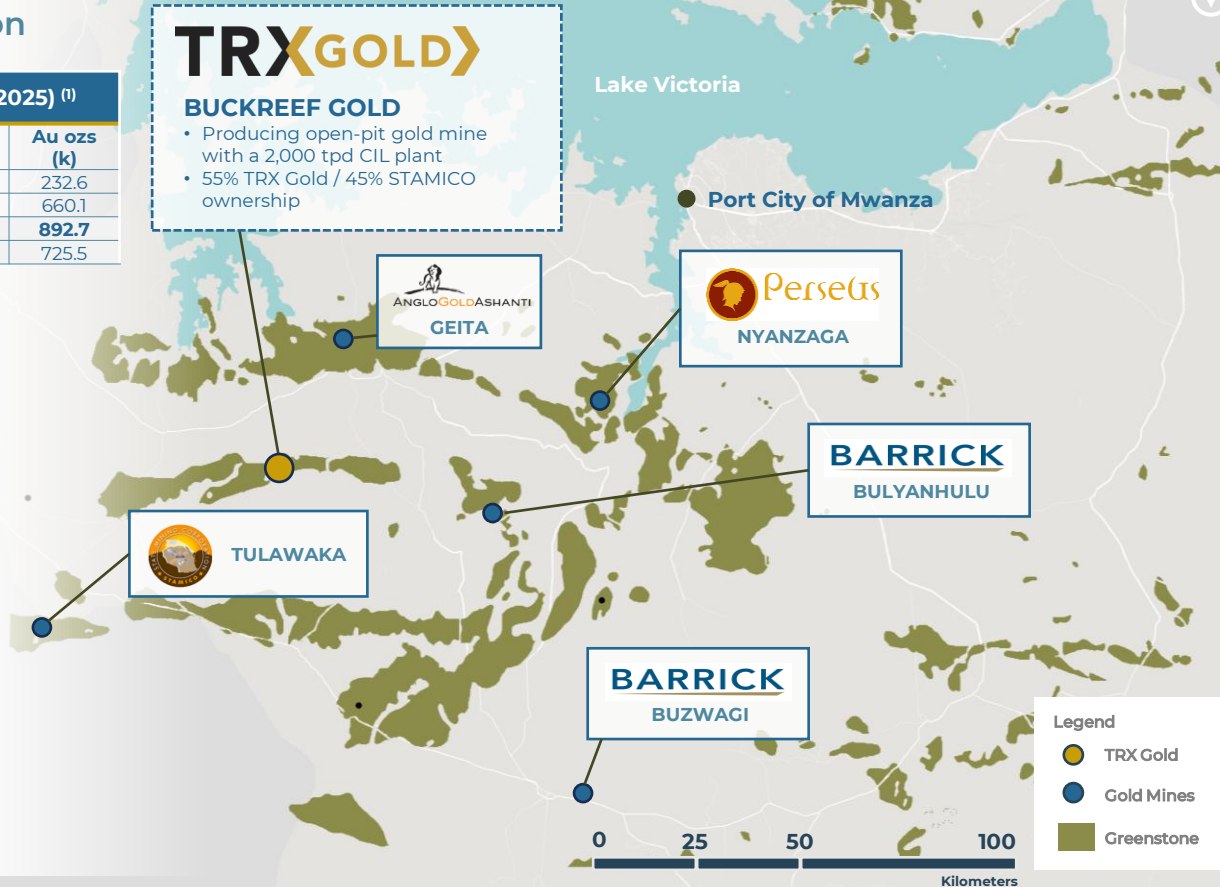

LOCATED IN ONE OF THE MOST INVESTABLE JURISDICTIONS IN AFRICA – TANZANIA

- Demonstrated **government backing for mining and foreign investment**
- **Over US\$2B in M&A and IPO transactions** in country in the last 24 months
- **Large, well-established gold industry** with meaningful contribution to GDP (~10% of GDP) and export growth (**Gold exports worth US\$2.95B** in 2023, up 39% from 2022)
- **Robust regulatory framework and reliable infrastructure**, including access to hydroelectric power supporting stable operations
- **Deep local talent pool** and efficient supply chain, driven by a long mining history and presence of major operators in the region

TRX GOLD

BUCKREEF GOLD

- Producing open-pit gold mine with a 2,000 tpd CIL plant
- 55% TRX Gold / 45% STAMICO ownership

3

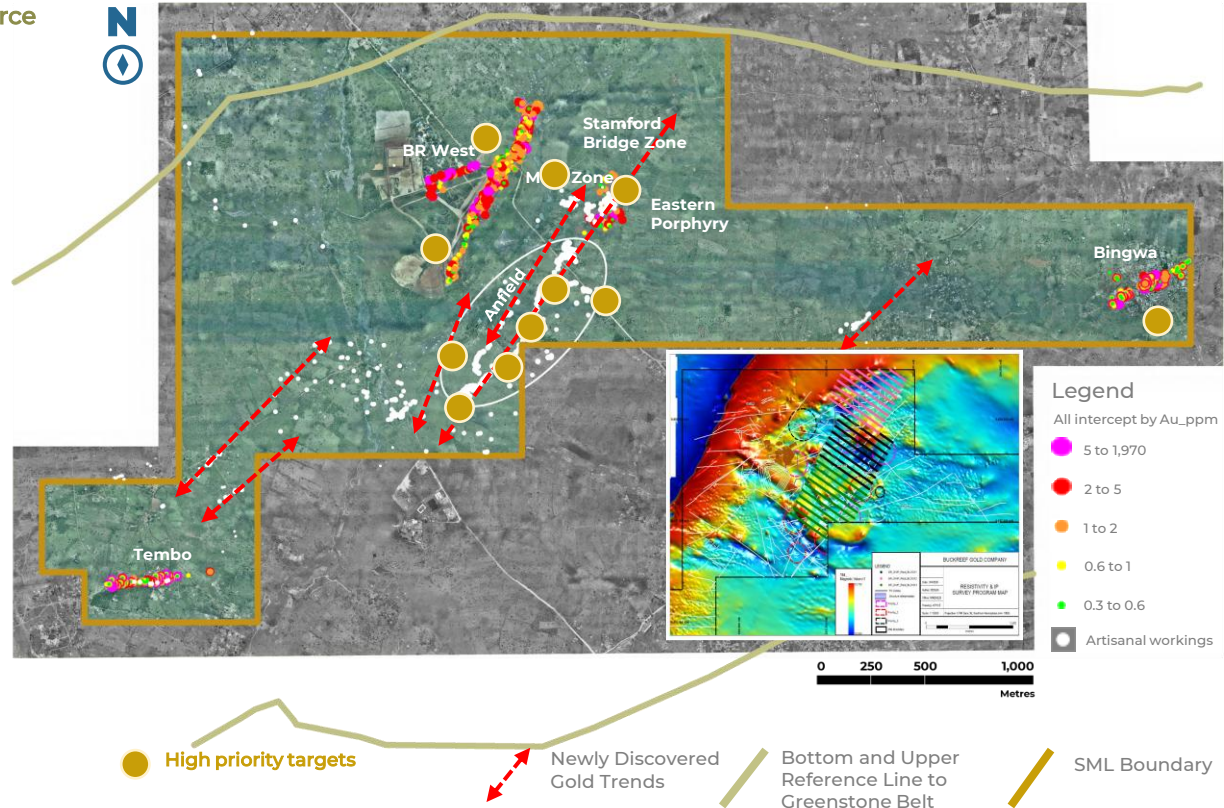

INCREASING RESOURCE BASE – DRILLS CONTINUE TURNING IN F2026

Blue-sky potential plentiful at Buckreef Gold

Anfield Zone with All Significant Intercept Map

Goal of Drilling is to Increase the Mineral Resource

- **Recent discovery of the new Stamford Bridge shear zone** demonstrating similar geology as Buckreef Main.
- Anfield & Eastern Porphyry: Multiple zones of strong mineralization **running sub-parallel and in close proximity** to the Buckreef Main Zone.
- **Eastern Porphyry:** Hole BMDD298 intersected **14.0 m grading 3.48 g/t**, including **3.0 m grading at 10.96 g/t** from 27.0 m, and **25.23 m grading @ 1.62 g/t Au** from 47 m.
- **Anfield:** Hole AFDD001 intersected **2.94 m grading at 13.74 g/t**, from 43.00 m.
- **Wide zones** of mineralization under the historical pit showed **continuity over 200m**.
- **Exploration budget of \$3-5M in fiscal 2026**, including geophysics, resource drilling at the Main Zone, exploration drilling at the Stamford Bridge Zone, and RC drilling at Eastern Porphyry.
- **Magnetic survey**, a 810 line-km ground magnetic survey completed, identified 10 exploration targets, a follow-up 40 line-km gradient array resistivity and induced polarization survey has been initiated.

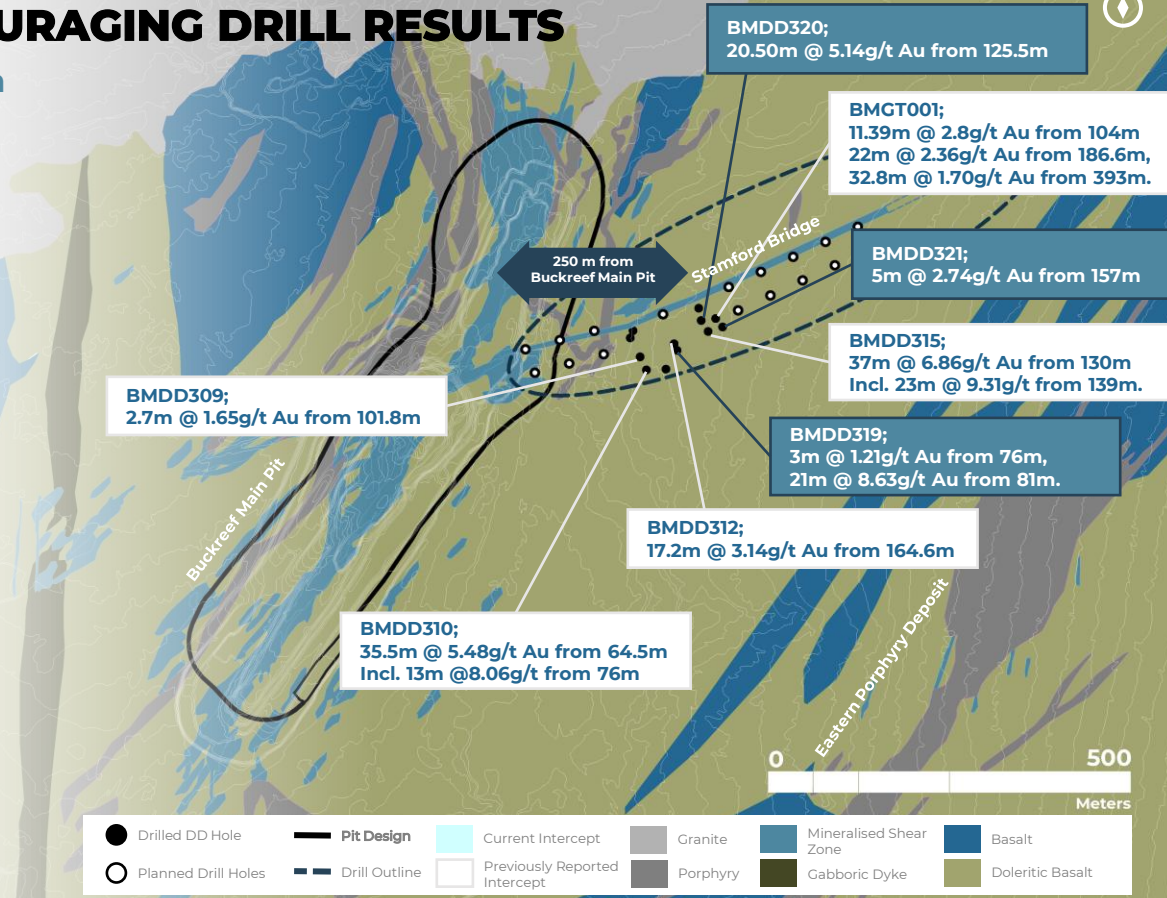

INCREASING RESOURCE BASE – STAMFORD BRIDGE SHEAR ZONE DELIVERING ENCOURAGING DRILL RESULTS

Returning best drill results EVER in Buckreef Gold's history

Stamford Bridge Shear Zone

- Best drill result ever, on a gram x tonne x meters ("gtm") basis ⁽²⁾:
 - BMDD315 intersected **37 m @ 6.86 g/t Au (253.82 gtm)** from 130 m.
 - BMDD310 intersected **35.5 m @ 5.48 g/t Au (194.54 gtm)** from 64 m.
 - BMDD319 intersected **21 m @ 8.63 g/t Au (181.23 gtm)** from 81 m.
 - BMDD320 intersecting **20.50 m @ 5.14 g/t Au (105.37 gtm)** from 125.5 m.
- Shear zone trending 070 East Northeast, forming a **"bridge"** between the Main Zone and Eastern Porphyry deposit and Anfield Zone to the Southeast.
- Stamford Bridge has the **potential to reach 1 km in strike length** and to become a significant shear structure.

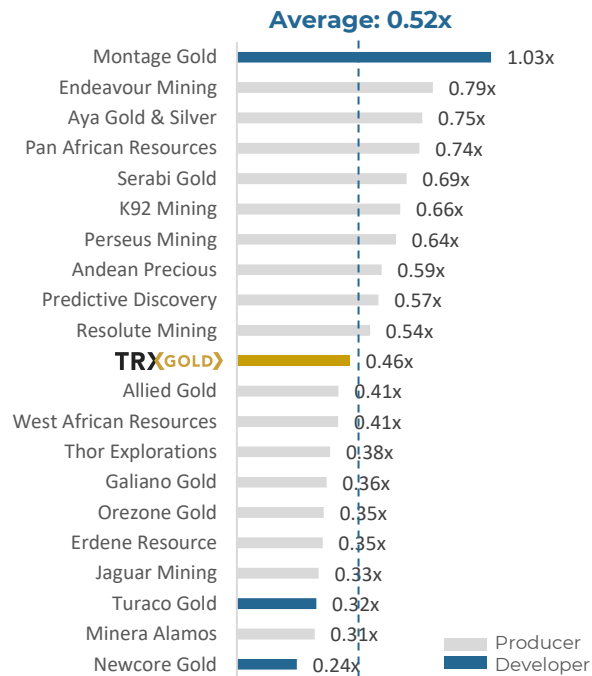

GROWING UNDERLYING METRICS SUPPORTS IMPROVED VALUATION

Strengthened trading multiples for TRX Gold reflect the market recognition of operational progress, increased confidence in the expansion plan, and an improved balance sheet

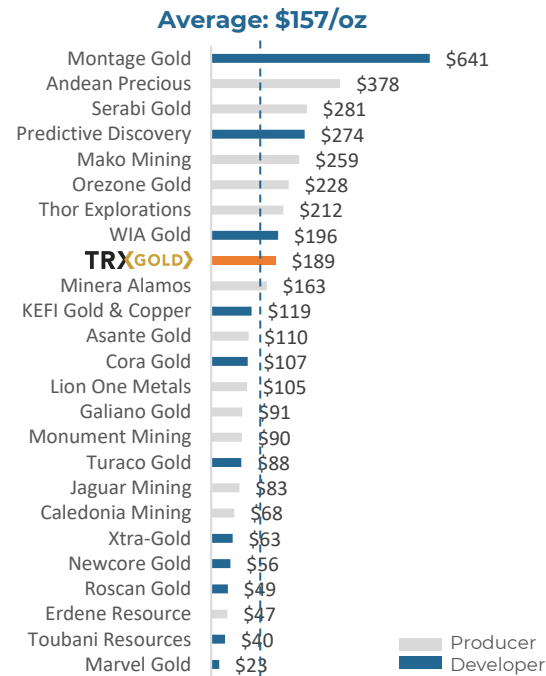

EV / EBITDA (2027E) ⁽¹⁾ – Producers

P / NAV ⁽¹⁾ – Producers & Developers

EV / oz Au Eq. (US\$/oz) – Producers & Developers

WELL-POSITIONED TO SELF-FUND FUTURE GROWTH

Funded balance sheet with \$26M cash and minimal debt; strong capital markets presence

EXECUTIVE TEAM

STEPHEN MALLOWNEY - CEO

- ▶ Former Partner & Managing Director at PwC, leading Deals Mining Group
- ▶ Vast experience in advising mining companies and Governments on operational improvements, financings, M&A, and stakeholder issues
- ▶ CPA, CA, CFA and BBA

RICHARD BOFFEY – COO

- ▶ Held several senior executive positions with multi-national mining companies
- ▶ 35+ years experience in open-pit and underground mining, including areas such as process plant commissioning, establishment of technical and operating teams, development of policies, and systems and process optimization

MICHAEL P. LEONARD – CFO

- ▶ Distinguished career in the gold industry with broad, progressive experience in investor relations and corporate finance with over 17+ years in financial leadership at Barrick Gold Corporation
- ▶ Renowned for gold industry knowledge, and results oriented mindset
- ▶ CPA, CA

KHALAF RASHID – SVP, TANZANIA & MD

- ▶ Distinguished career in Tanzanian business, politics and Government
- ▶ Vast experience in advising the Government of Tanzania and well versed in Government policy
- ▶ Extensive leadership experience

APPENDIX – KEY HIGHLIGHTS OF Q2 2026 (ENDING FEB 28, 2026)

Record Gold Production and Sales

- ▶ Another record quarterly production of 7,453 oz and sales of 7,314 oz, representing a 115% increase over Q2 2025
- ▶ On track to achieve its fiscal 2026 guidance of 25,000 – 30,000 oz gold at a total average cash cost of \$1,400 - \$1,600/oz

Record Realized Gold Price and Cash Generation

- ▶ Realized gold price averaged ~US\$4,655/oz in Q2 2026, up from Q2 2025 average of US\$2,739/oz
- ▶ Quarterly revenue \$34.1M and Adj. EBITDA of \$20.2M, demonstrating improved cash flow and margins

Robust Recoveries with Upgrades and Expansion Progressing

- ▶ Recoveries of 89% - 92% were achieved from additional metallurgical test work
- ▶ Better understanding of optimal grind size for flotation
- ▶ Optimal SAG and ball mill combination of 3,500+ tpd
- ▶ Plant upgrades are currently in progress and are expected to be completed by calendar Q4 2026

Strategic Mine Planning to Expand Further

- ▶ Initiated a revision of the life-of-mine plan as a result of the expected increase in processing capacity
- ▶ Potential to extend open pit and improve economics
- ▶ Hired P&E Mining Consultants Inc. to update the PEA, which is expected to be completed in Q4 2026

Working Capital Significantly Strengthened

- ▶ Improved working capital due to increased production, cash flow generation, and increase in stockpile inventory (~20.1k oz stockpile worth ~US\$107.5M)
- ▶ Cash balance increased to US\$26M (+US\$16.8M from Q1 2026)

Stage 2 Expansion at Buckreef

Pre-Leach Thickener Erection in Progress

APPENDIX – Q2 2026 – FINANCIAL AND OPERATING OVERVIEW

Increase in revenue, gross profit, and adjusted EBITDA¹

Gold production & sales: Poured 7,453 oz and sold 7,314 oz, generating:

- ▶ Revenue of \$34.1M, Gross profit of \$21.1M, adjusted EBITDA¹ of \$20.2M.
- ▶ Recorded a record average realized gold price net² of \$4,655 per ounce.

Robust Recoveries Achieved: Recovery rates of 89% - 92% from additional metallurgical test work, which is in line with prior studies and above 88% recovery in the 2025 PEA.

Advancing Existing Processing Plant Upgrades and Increased Expansion: Existing processing plant is currently undergoing upgrades and plan to operate along with a new 3,500+ tpd SAG mill processing plant.

Strategic Mine Planning to Expand Further: Review underway of life-of-mine plan, expected increase in processing capacity, and updated PEA expected in Q4 2026.

Working Capital Strengthened: Improved worked capital due to increased production, organically generated cashflow, improved liquidity and an increase in stockpile inventory. Cash balance at Q2 2026 was \$26M.

Exploration Plans: Processed ground magnetic data collected and commissioned its first drill rig with the goal of upgrading the Mineral Resource at the Eastern Porphyry.

Fiscal 2026 Outlook:

- ▶ **Gold Production:** 25,000 – 30,000 oz at average cash cost of \$1,400 – \$1,600/oz.
- ▶ **Capital Expenditures:** US\$15 – \$20M. Focused on plant upgrade and expansion, construction of tailings storage, and excludes waste stripping.
- ▶ **Exploration Expenditures:** US\$3 – \$5M. Resource drilling on Main Zone and exploration drilling on Stamford Bridge and Eastern Porphyry.

Financial results in US\$ (at Feb 28 th of each year)	Q2 2026	Q2 2025

Inferred	19.6	1.14	718	9.1	2.47	726

- ▶ The major sources of differences between the 2020 Mineral Resource Estimate ("MRE ") and 2025 MRE are as follows:
 - ▶ The 2025 MRE utilized a constrained optimized pit shell and underground workings which resulted in a reduction in volume for material to the 450 m EL level (which is the maximum depth of the underground workings in the PEA) as well as the exclusion of certain footwall and hanging wall low grade material (combined, this resulted in a reduction of ~10 Mt of material grading ~1.50 g/t Au containing ~500 koz);
 - ▶ The 2025 MRE utilized a cut-off grade of 1.3 g/t Au for underground mining versus a 0.4 g/t Au cut-off grade in 2020 MRE (this resulted in a reduction of ~25 Mt grading ~0.70 g/t Au containing ~500 koz);
 - ▶ Removal of ~ 4.5 years of production to date (this resulted in a reduction of 1.35 Mt grading 1.95 g/t Au containing 85 koz Au); and
 - ▶ Removal of Tembo and Bingwa deposits from 2025 MRE due to unquantifiable small scale mining activity by local residents (this resulted in a reduction of 2.1 Mt grading 2.12 g/t Au containing 143 koz).

APPENDIX – NOTES ON MINERAL RESOURCE ESTIMATE

Mineral Resource Estimate Methodology

The Buckreef Gold and Stamford Bridge Mineral Resource models were developed by P&E from 135 wireframes and one respective wireframe, all created by P&E over respective 2.2 km and 155 m strike lengths. Buckreef Gold utilized 884 drill holes while Stamford Bridge utilized eight. Wireframes were developed from an open pit cut-off of 0.40 g/t Au while underground was 1.20 g/t Au. Both Mineral Resource models utilized 1.0 m capped composites ranging from no capping to 60 g/t Au. Block models were set up with 2.5 m x 5.0 m x 5.0 m blocks rotated 30 degrees clockwise and used a bulk density of 2.70 t/m³. Grade interpolation was done with inverse distance cubed estimation. Based on variography, Measured Mineral Resources were those blocks classified within 20 m of three drill holes while Indicated Mineral Resources were classified within 40 m of three drill holes. All other wireframe constrained grade blocks were classified as Inferred Mineral Resources. Pit-constrained and out-of-pit Mineral Resources were reported above respective 0.42 g/t and 1.31 g/t Au cut-offs.

Notes

(1) Mineral Resources, which are not Mineral Reserves, may not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant issues.

(2) The Inferred Mineral Resource in this estimate has a lower level of confidence than that applied to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of the Inferred Mineral Resource could be upgraded to an Indicated Mineral Resource with continued exploration.

(3) The Mineral Resources were estimated in accordance with the Canadian Institute of

Mining, Metallurgy and Petroleum (CIM), CIM Standards on Mineral Resources and Reserves, Definitions and Guidelines prepared by the CIM Standing Committee on Reserve Definitions and adopted by the CIM Council.

(4) Gold price used is US\$1,900/oz Au.

(5) The pit constrained cut-off grade of 0.42 g/t Au was derived from 80% process recovery, US\$21.04/tonne process and G&A cost, and a royalty of 7.3%. The constraining pit optimization parameters were US\$3.88/t mining cost and 45-degree pit slopes.

(6) The out-of-pit cut-off grade of 1.31 g/t Au was derived from 80% process recovery, US\$21.04/tonne process and G&A cost, a US\$40/tonne underground mining cost, and a royalty of 7.3%. The out-of-pit Mineral Resource grade blocks were quantified below the constraining pit shell and within the constraining mineralized wireframes. Out-of-Pit Mineral Resources are restricted to areas which exhibit geological continuity and reasonable potential for extraction by cut and fill and long hole mining methods.

(7) The Stamford Bridge cut-off grade of 1.20 g/t Au was derived from 80% process recovery, US\$21.04/tonne process and G&A cost, a US\$35/tonne underground mining cost, and a royalty of 7.3%. Mineral Resources are restricted to areas which exhibit geological continuity and reasonable potential for extraction by cut and fill and long hole underground mining methods.

ENDNOTES

1. The company has included certain non-IFRS measures in this presentation. Refer to the Company's February 28, 2026 MD&A for an explanation, discussion and reconciliation of non-IFRS measures. The Company believes that these measures, in addition to measures prepared in accordance with International Financial Reporting Standards ("IFRS"), provide readers with an improved ability to evaluate the underlying performance of the Company and to compare it to information reported by other companies. The non-IFRS measures are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. These measures do not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures presented by other issuers.
2. Total cash costs are reflective of the cost of production. Total cash costs reported in the PEA include mining costs, processing and water treatment costs, general and administrative costs of the mine, off-site costs, refining costs, transportation costs and royalties. Total cash costs per ounce is calculated as total cash costs divided by payable gold ounces.
3. AISC is reflective of all of the expenditures that are required to produce an ounce of gold from operations. AISC reported in the PEA includes total cash costs, sustaining capital, closure costs and salvage, but excludes corporate general and administrative costs. AISC per ounce is calculated as AISC divided by payable gold ounces.
